

GOURAV VANI

Machine Learning Engineer | AI/ML Final Year Student

+91-9644575202 • linkedin.com/in/gourav-vani-a648b0375 • github.com/gouravvani267 • Indore, India

EDUCATION

B.Tech — Artificial Intelligence & Machine Learning | IPS Academy, Indore

Aug 2023 – May 2027

CGPA: 9.4 / 10.0 • **Coursework:** ML, Deep Learning, NLP, Computer Vision, Data Structures & Algorithms, Statistics

EXPERIENCE

Machine Learning Intern | Scaler Technologies Pvt. Ltd.

Feb 2026 – Apr 2026

- Automated resume screening for 1,000+ job postings by 70% via an end-to-end ATS pipeline using NLP, Scikit-learn, and REST API endpoints; achieved 92% keyword-matching accuracy across 5,000–8,000 resumes.
- Boosted churn recall by 18% on 50K+ customer records training Random Forest and XGBoost ensembles with SMOTE oversampling; final model reached 91.4% prediction accuracy.
- Reduced stakeholder reporting time by 60% building Power BI / Tableau dashboards backed by Python (Pandas, NumPy, Matplotlib, Seaborn) for real-time ML model monitoring.
- Cut text preprocessing time by 35% on a 25K+ review corpus implementing TF-IDF + Logistic Regression and Naive Bayes; achieved 88% sentiment classification accuracy.

Machine Learning Intern | CodSoft

Dec 2025 – Jan 2026

- Achieved 99.2% fraud detection accuracy and 94% recall on 284K+ transactions using XGBoost + Random Forest with SMOTE; inference served via REST API at sub-10ms latency.
- Delivered 98.6% spam detection accuracy at under 2ms latency on 5,500+ messages with Naive Bayes + SVM ensemble; containerized using Docker for reproducible deployment.
- Reached 82% macro F1 across 20 genres on 27K+ movie plots with multi-label TF-IDF + Logistic Regression, threshold-tuning, and stratified cross-validation.

PROJECTS

AI Legal Assistant | Python, FastAPI, RAG, FAISS, LangChain, React | live website

- Deployed a production RAG system over the Indian legal corpus (10,000+ clauses) that cut query resolution time ~70% vs. manual research and reduced hallucinations by 60% via citation grounding and multi-turn context architecture.

NexusBank — Loan Approval System | Scikit-learn, SHAP, React, REST API, Vercel

- Built a Random Forest classifier at 91% approval accuracy with a real-time risk dashboard at under 500ms latency; SHAP values surface the top 5 risk factors per application for loan officers.

Handwritten Text Generation | LSTM, TensorFlow, Keras, IAM Dataset | GitHub

- Reduced LSTM training loss by 35% on the IAM dataset using gradient clipping and LR scheduling over 50 epochs.

TECHNICAL SKILLS

Languages: Python, SQL, C++

Frameworks & Libraries: TensorFlow, Keras, PyTorch, Scikit-learn, XGBoost, Hugging Face Transformers, NLTK, SciPy, Pandas, NumPy, Matplotlib, Seaborn

ML Techniques: Classification, Regression, Clustering, NLP, RAG, LSTM, CNN, Ensemble Methods, SMOTE, SHAP, FAISS, Feature Engineering, EDA, Predictive Modeling

MLOps & Deployment: REST APIs, FastAPI, Docker, Git, GitHub, Vercel, AWS, LangChain

Data & Visualization: Power BI, Tableau, SQL, MongoDB

Generative AI: RAG Pipelines, LLM Integration, Prompt Engineering, AI Agents

CERTIFICATIONS & SIMULATIONS

Technology Job Simulation — Deloitte via Forage — SDLC, Agile, Debugging

Oct–Dec 2025

Developer & Technology Simulation — Accenture via Forage — Testing, Algorithmic Thinking

Dec 2025

Solutions Architecture Simulation — AWS via Forage — High-Availability Architecture

Dec 2025
